

Corrugated fiberboard solutions are the most sustainable medium of packaging choice. However, packaging that fails to protect the product can cause considerable damage to a brand's reputation.

EzeeRip Protect provides an easy opening to board solutions and is highly suitable for the inner reinforcement of tope and side hole handles. It enhances box strength for unparalleled packaging performance. It is perfect for applications that include inner or outer reinforcement of corrugated boxes to prevent tearing or bursting

Product Information:

Enhanced Durability

EzeeRip Protect is engineered to fortify packaging, elevating the load-bearing capacity. The application of EzeeRip Protect increases stacking efficiency & also minimizes package deformation and bulging. When applied to critical stress points, such as package handles, the tape provides a robust safety net against material failure.

Effortless & Eco-Friendly Application

EzeeRip Protect is coated with a pressure-sensitive adhesive that bonds without the need for harsh solvents. It is compatible with a variety of packaging substrates, including corrugated boxes, fibreboard, and materials with high recycled content.

Commitment to Sustainability

In line with our dedication to a circular economy, EzeeRip Protect is designed to integrate smoothly into the recycling stream alongside the materials they are applied. Our ongoing commitment to sustainability is reflected in our efforts to innovate and provide greener packaging solutions.

Localized Global Expertise

We pride ourselves on combining the expansive reach of a global enterprise with the personalized care of a local business. Our dedicated team offers unparalleled technical support and customer service, ensuring that expert assistance is always within reach.

Key Benefits

Boosts packaging robustness and overall strength

Excellent Longitudinal and Transverse Tensile Strength

Exceptional Resistance against Tearing and Bending

Maximizes stacking efficiency and reduces bulging

Reinforces handle security and prevents tearing

Simplifies opening without the need of perforation

Streamlines the entire product line application

Not Sure What You Need?

Our technical tear tape experts can help you identify your precise requirements and relevant offerings.
