

THERMOFORMING FILMS

Where Clarity Meets Strength

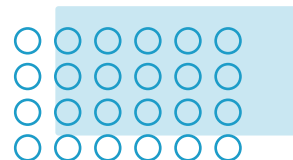

ABOUT US

Bagla Group manufactures **Thermoforming Films, POF Shrink Films, Tear Tapes and Adhesive Tapes**. Over **40 years**, we have supplied more than **USD 500 million** worth of products to over **2,000 customers** across **50 countries** and **6 continents**.

With **8 factories** across India, Mexico, Indonesia and Paraguay, **2 warehouses** in the USA and Europe, and **16 international sales offices**, we deliver over **500 SKUs** across **50 product categories**.

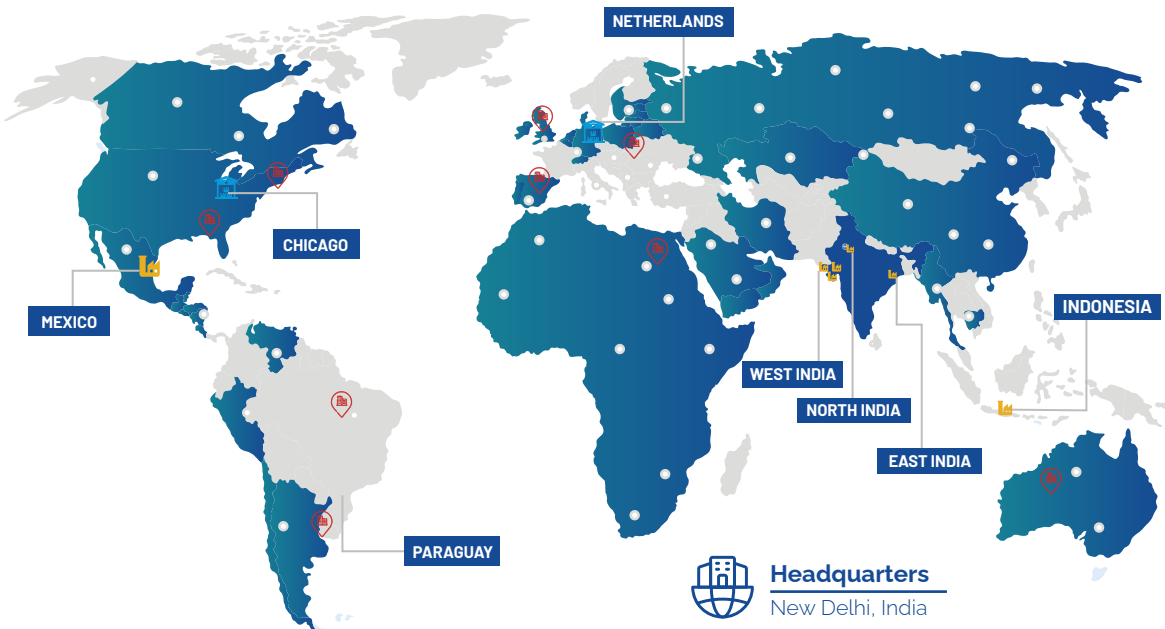

Our factories are certified to **BRC, FSSC 22000, ISO, Halal and Kosher**, and our films meet **FDA food-contact** and **EU REACH** requirements.

EXPANDING PORTFOLIO OF OUR GLOBAL CUSTOMERS

ONE WORLD, ONE BAGLA GROUP

8 Manufacturing Factories

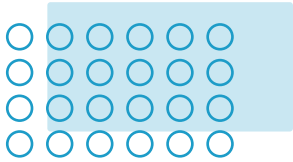

2 International Warehouses

Customer Footprint in 50+ Countries

16 Sales Offices

Key Markets:

USA • Canada • Mexico • Germany • UK • France • Italy • Spain • Poland • Brazil • Argentina • Australia

Our Mission

To help our customers grow their market share and profits,
by providing them with consistent quality and on time
delivery of the widest range of innovative products, while
always keeping them competitive.

Industries catered

At Bagla Group, quality isn't just a promise — it's proven. Our thermoforming films are manufactured to the highest global standards, backed by rigorous testing and industry-leading certifications. Every roll reflects our commitment to consistency, safety, and performance, ensuring our customers receive nothing but the best.

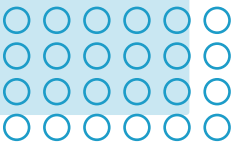

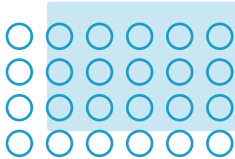

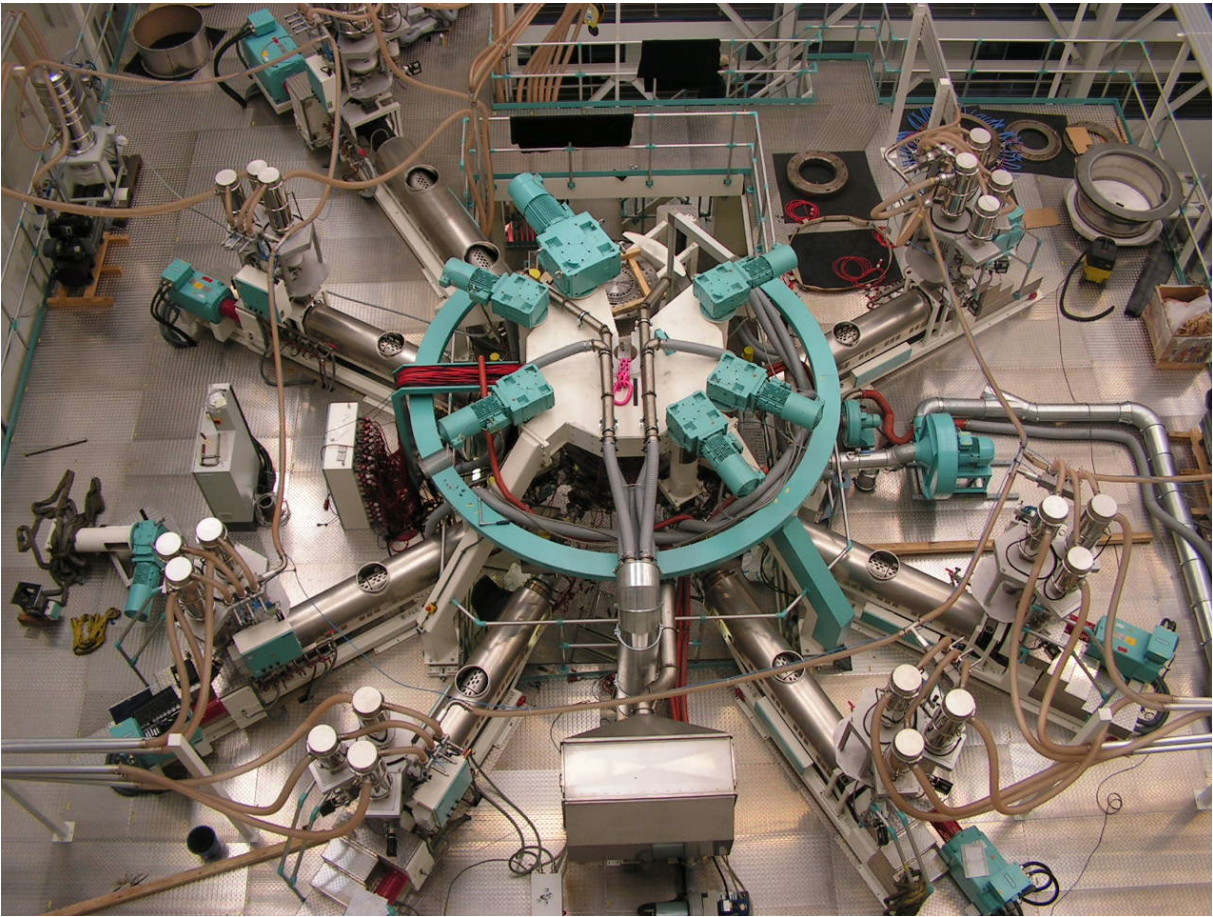

PRODUCT CERTIFICATIONS

INFRASTRUCTURE

- Our water-quenching blown film lines rapidly cool the plastic melt, resulting in film properties perfectly suited for thermoforming applications.
- The rapid cooling of the melt suppresses crystallization, preserving the film's transparency and gloss. This results in enhanced puncture and tear resistance along with excellent forming characteristics.
- The film also features a softer touch and a premium appearance.
- Asymmetrical multilayer structures—made from different material classes—benefit from minimal curl, ensuring smoother processing on downstream equipment.

KEY FACTS	
Number of layers:	7
Width :	1500 mm
Thickness :	65-350 µm
Output:	up to 1200 kg/h
Infrastructure:	Cool Bubble Technology, Kuhne, Germany

QuenchTekTM HB

PA/EVOH/PE High Barrier Thermoforming Film

QuenchTek HB delivers high-barrier performance for maximum product freshness. Designed with an EVOH core, it locks out oxygen, moisture & aroma transfer - extending shelf life and preserving flavor. Perfect for food packaging that demands premium protection and uncompromising quality.

KEY BENEFITS:

- **Better shelf impact:** Crystal-clear packaging highlights product visibility, giving competitive edge in the retail environments.
- **Attractive brand presentation:** High-quality film printing enables cohesive, premium-looking packaging designs.
- **Faster turnaround:** Efficient stocking programs ensure quick lead times to meet the increasing market demand.
- **Greater cost-savings:** Excellent forming performance provides uniform pockets with opportunities for down-gauging.

AVAILABLE AS:

Thickness:	65µm up to 350µm
Composition:	EVOH: 5%, PA: 30%, PE: 65% (Tolerance: ± 5%)
Widths Available :	100mm to 1320 mm (+1mm, -0mm)
Versions:	Transparent, Coloured, or Printed, Peelable
Printing:	HD gravure or flexo print (up to 10 colours)

QuenchTekTM MB

PA/PE Medium Barrier Thermoforming Film

QuenchTek MB offers the perfect balance of protection and performance for products with a shorter shelf life. Advanced water-quenched blown film technology delivers reliable deep-draw performance and superior forming capabilities. Manufactured from premium PA and PE layers, it provides protection against moisture and handling damage while maintaining freshness. Ideal for fresh produce, processed foods, and moderate-barrier needs, with thickness options from 65 µm to 350 µm.

KEY BENEFITS:

- Strong puncture resistance to protect products through handling and transport.
- Superior clarity and gloss for outstanding product presentation.
- Fast, efficient sealing to boost productivity on high-speed lines.
- Smooth, consistent processability with minimal downtime.
- Wide operating window for optimal performance across various equipment types.
- Reliable sealing strength for secure, tamper-resistant packs.
- Good formability for deep-draw and complex-shaped applications.

AVAILABLE AS:

Thickness:	65µm up to 350µm
Composition:	PA: 30%, PE: 70% (Tolerance: ± 5%)
Widths Available :	100mm to 1320 mm (+1mm, -0mm)
Versions:	Transparent, Coloured, or Printed, Peelable
Printing:	HD gravure or flexo print (up to 10 colours)

QuenchTek™

PA-Free
Thermoforming Film

MONO

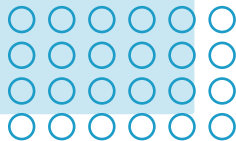

PA-FREE THERMOFORMING FILM

QuenchTek Mono is a high-barrier thermoforming film built on a polyethylene (PE) base with an EVOH oxygen-barrier layer. By removing polyamide (PA) from the structure, the film stays within a single polymer family — making it a true mono-material film that is recyclable in existing PE streams, while retaining the high oxygen barrier and deep-draw performance of a conventional PA/EVOH film.

AVAILABLE AS :

Thickness:	100 to 350 µm
Composition:	PE: 95%, EVOH: 5% (Tolerance: ± 5%)
Widths Available:	100mm to 1320 mm (+1mm, -0mm)
Versions:	Transparent, Coloured, or Printed, Peelable
Printing:	HD gravure or flexo print (up to 10 colours)

THERMOFORMING FILMS

QuenchTek™

BONEGUARD THERMOFORMING FILM

BG

QuenchTek BG is a high-performance bone guard thermoforming film designed to protect against the toughest packaging challenges - sharp bones, irregular edges & cut surfaces common in bone-in meat, cured meat, and fresh meat applications. Manufactured using advanced German Water Quenching Technology, it delivers exceptional puncture resistance without compromising on clarity, formability, or shelf appeal.

AVAILABLE AS :

Thickness:	65 to 350 µm
Composition:	PA: 40%, PE: 60% (Tolerance: ± 5%)
Widths Available:	100mm to 1320 mm (+1mm, -0mm)
Versions:	Transparent, Coloured, or Printed, Peelable
Printing:	HD gravure or flexo print (up to 10 colours)

THERMOFORMING FILMS

QuenchTek™

MBPP

PA/PP MEDIUM BARRIER THERMOFORMING FILM

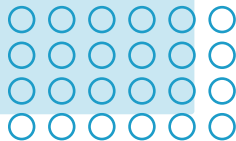

Suitable for high-temperature food packaging applications upto 121°C, these films are made using PA/PP layers. These highly transparent films deliver superior puncture resistance & exceptional performance during cooking, pasteurization, sterilization, and microwave heating.

AVAILABLE AS :

Thickness:	90, 180, 200 µm
Composition:	PA: 30%, PP: 70% (Tolerance: ± 5%)
Widths Available:	100mm to 1320 mm (+1mm, -0mm)
Versions:	Transparent, Coloured, or Printed, Peelable
Printing:	HD gravure or flexo print (up to 10 colours)

THERMOFORMING FILMS

QuenchTek™

HBLS

HIGH BARRIER LOW TEMPERATURE FORM-FILL-SEALING FILM

QuenchTek HBLS is a high-barrier flexible non-formable web designed for vacuum & gas flush applications where low O2 levels are required. it offers excellent clarity, superior puncture resistance, abrasion resistance & strong flex-crack performance.

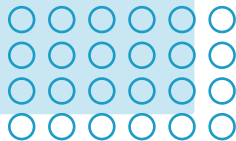

- The integrated EVOH barrier ensures reliable oxygen protection.
- Utilizes a sealant with excellent caulk and flow characteristics for sealing through contamination.
- Suitable for applications where package clarity, outside package COF, and package tightness are critical packaging criteria.

AVAILABLE AS :

Thickness:	65 to 350 µm
Composition:	PA/tie/PA/EVOH/PA/tie/mLLDPE
Widths Available :	100mm to 1320 mm (+1mm, -0mm)
Versions:	Transparent, Coloured, or Printed, Peelable
Printing:	HD gravure or flexo print (up to 10 colours)
Suitable Packaging Machinery:	VFFS , HFFS , Thermoformable HFFS

THERMOFORMING FILMS

ARE YOU STRUGGLING WITH:

- Constantly chasing your suppliers for delivery
- Even after chasing you don't get your delivery on time
- Sales are not growing
- Loss of customers due to quality issues
- Margins are shrinking and costs are going up
- You are fighting competition, discount and credit
- Deliveries are not predictable which leads to cash flow issues
- Supplier does not take responsibility of the quality
- You do not have new products to offer
- You run out of material when you need it most
- You are still selling the same old products with low margins
- You need to chase your supplier for any information
- You are at risk of political changes disrupting your supply chain
- You get material that is not of correct length and weight
- There is always a new excuse and problem
- Price always increases and without logic
- Coordinating with too many suppliers
- You are tired of fighting
- The joy of doing business is no longer there

If yes, all these problems will vanish after you work with us.

RESULTS YOU WILL GET WORKING WITH US:

- Never Run Out of Material
- Always have the latest and most innovative products to sell
- Get a wide range of products from single source
- No more hassles and delays in deliveries
- Transparent and fair pricing 365 days a year
- Correct market information and trends
- Super fast claim resolutions
- Dedicated customer relationship officer available 24x7
- Always get facts and not excuses

- Guaranteed length and weight of all products
- Local sales rep to help you with trainings and information
- Gain market share by world class service
- Innovative products to increase your margins
- Have a dedicated dashboard to see all your orders and delivery
- No more fighting and all focus only on growing business
- Ease of doing business and peace of mind

Your Buying will be on Autopilot so you can focus your energy only on Selling and growing your Profits.
